REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The present invention is directed to a display device including a display screen, and horizontal and vertical displays, the horizontal and vertical display signals to render an image on the display screen. The independent claim 1 identifies the distinct features: "first and second adders combining the x- and y-compensation signals with the horizontal and vertical display signals to dynamically adjust a location of the image of the display screen while the display device is subject to movement; and a predictive controller to predetermine the compensation signals for a next frame while displaying a previous frame prior to the movement". All the references of record, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
